Dear Your Honor:
On January 16, 2020, I appeared before the Court for the purpose of reviewing the proposed agreement with him to ensure that he understood the terms. The Court graciously obliged and reviewed the terms with Defendant Foster at the Bench, with undersigned seated at counsel table. Indeed at one point, at Defendant's request, along with Ms. Bogue and Mr. and Mrs. Gildred stepped outside the courtroom in order to allow Defendant Foster to review the agreement with the Court outside of our presence. Defendant Foster agreed to the Stipulation of Settlement and signed it in the presence of the Court. The Court ensured that all parties had a fully executed copy and the Stipulation of Settlement was "So Ordered" by the Court and uploaded the ECF system that day. The Court graciously obliged and reviewed the terms with Defendant Foster.

Foster claims in an appeal to the First Appellate Department that the stipulation was signed under JURISTS PRISMS. But there's another coin side to the story.

Another Coin to the story: Foster's team made public to the State OF NEW YORK DEPARTMENT OF LAW PUBLIC INTEGRITY BUREAU Attorney General's report ID #1-408943382 to which examined Bribery and overall misconduct by Justice Louis Nock, Rafkin Seth Alan, Jennifer Bogue for and on behalf of Philip T. Today Foster's latest iPiD replica in global technology is a portal enabled services for individuals to replicate their own iPiD, access, store & used as a tool to explore the dark web for unauthorized use of their iPiD.

Once Democrats wins in November, its more likely Congress will succeed in passing SYG-LAW (Stand Your Ground). Then Social Media platforms & Search Engines as Google must introduce algorithms to pay users per click or impression used for generating advertising revenues.

Large Companies as Nike, NBA would pay yearly ransoms to individuals wearing their brands, as users are by proxy contractors similar to a Lebron James.

This is Foster's Economical Services Co. 1992 Inc. a network, on large-scale, increasingly complex tasks for corporate admin, Security and business professionals with efficiency, clarity, and confidence. Clients rely on Foster's to connect & replicate iPiD & streamline virtual administration of business operations, across IoT Platforms using mass iPiD replications.
